## §§ 251.4-251.6

orders of the Director/Regional Director, and other applicable statutes, regulations, and amendments.

- (a) This part does not apply to G&G exploration conducted by or on behalf of the lessee on a lease in the OCS. Refer to 30 CFR part 550 if you plan to conduct G&G activities related to oil, gas, or sulphur under terms of a lease.
- (b) Federal agencies are exempt from the regulations in this part.
- (c) G&G exploration or G&G scientific research related to minerals other than oil, gas, and sulphur is covered by regulations at 30 CFR part 580.

## §§ 251.4-251.6 [Reserved]

## § 251.7 Test drilling activities under a permit.

- (a) [Reserved]
- (b) Deep stratigraphic tests. You must submit to the appropriate BOEM or BSEE Regional Director, at the address in 30 CFR 551.5(d) for BOEM or 30 CFR 254.7 for BSEE, a drilling plan (submitted to BOEM), an environmental report (submitted to BOEM), an Application for Permit to Drill (Form BSEE–0123) (submitted to BSEE), and a Supplemental APD Information Sheet (Form BSEE–0123S) (submitted to BSEE) as follows:
- (1) Drilling plan. The drilling plan must include:
- (i) The proposed type, sequence, and timetable of drilling activities;
- (ii) A description of your drilling rig, indicating the important features with special attention to safety, pollution prevention, oil-spill containment and cleanup plans, and onshore disposal procedures:
- (iii) The location of each deep stratigraphic test you will conduct, including the location of the surface and projected bottomhole of the borehole;
- (iv) The types of geological and geophysical survey instruments you will use before and during drilling;
- (v) Seismic, bathymetric, sidescan sonar, magnetometer, or other geophysical data and information sufficient to evaluate seafloor characteristics, shallow geologic hazards, and structural detail across and in the vicinity of the proposed test to the total depth of the proposed test well; and

- (vi) Other relevant data and information that the BOEM Regional Director requires.
- (2) Environmental report. The environmental report must include all of the following material:
- (i) A summary with data and information available at the time you submitted the related drilling plan. BOEM will consider site-specific data and information developed since the most recent environmental impact statement or other environmental impact analysis in the immediate area. The summary must meet the following requirements:
- (A) You must concentrate on the issues specific to the site(s) of drilling activity. However, you only need to summarize data and information discussed in any environmental reports, analyses, or impact statements prepared for the geographic area of the drilling activity.
- (B) You must list referenced material. Include brief descriptions and a statement of where the material is available for inspection.
- (C) You must refer only to data that are available to BOEM.
- (ii) Details about your project such as:
- (A) A list and description of new or unusual technologies;
- (B) The location of travel routes for supplies and personnel;
- (C) The kinds and approximate levels of energy sources:
- (D) The environmental monitoring systems: and
- (E) Suitable maps and diagrams showing details of the proposed project layout.
- (iii) A description of the existing environment. For this section, you must include the following information on the area:
  - (A) Geology;
- (B) Physical oceanography;
- (C) Other uses of the area;
- (D) Flora and fauna;
- (E) Existing environmental monitoring systems; and
- (F) Other unusual or unique characteristics that may affect or be affected by the drilling activities.
